

WASHER TANK RC-WPXL

The Silent Sentinel Washer Tank is the perfect accessory for all of Silent Sentinel's camera platforms.

The washer tank system is a vital addition to any CCTV installation where the environment is susceptible to any form of dirt or airborne contaminants. The WA-WPXL range comes with a float-switch as standard; This feature protects the washer unit from running dry and therefore damaging the pump. When the water capacity reaches a set level the power is cut to the pump and the unit will no longer operate.

KEY FEATURES

- 5 litre, 10 litre or 25 litre reservoir capacity
- Float switch as standard
- UV stable water container
- Black UV stable hose
- IP67 Connectors
- RS485 control
- Simple installation
- Suitable for corrosive environments
- Capable of pumping 12m vertically

* Typical RC-WP5L/230-RS washer tank.
Detailed dimension drawings available upon request.
